VTX997

Rugged Dual slot 3U VPX Chassis for Test and Validation in Thermal Chamber and Shock/Vib Table

VTX997

Key Features

- Dual Conduction cool slots 3U VPX Chassis for Test and Validation
- Active environmental Chamber Testing with Shock/Vibration
- The wedges are kept at a fix temp and/or controlled by the software to follow a temperature protocol
- All I/O can be routed from the two slots to an external device outside of the Chamber to drive the I/O
- The backplane provides the break out

Benefits

- Rugged construction suitable for automating testing in the chamber and during Shock/Vibration
- Qualified to MIL-STD-810 for Temperature, Humidity, Salt Fog and Shock. Qualified to MIL-STD167 for Vibration
- Electrical, mechanical, software, and system-level expertise in house
- Full system supply from industry leader
- AS9100 and ISO9001 certified company

OpenVPX™

THE POWER OF VISION

VTX997

The VTX997 is a VPX rugged chassis with two 3U VPX conduction cool slots.

The VTX997 backplane is designed specifically based on the VPX Payload modules.

Power Supplies

Power is provided via external power supply.

Cooling and Temperature Sensors

The VTX997 cooling is done thru the wedge locks. The wedge locks are set to a fix temperature or follow a temperature protocol. There are total of 16 temp sensors that monitor the wedge temperature and keep the wedge at a set temperature.

The VTX997 is front to back cooling with variable speed fan based on the wedge temperature set.

Figure 1: VTX997 Front View

Backplane

The backplane is routed per customer requirement as well as the I/O breakout.

I/O

The I/O from each slot is routed to connectors so they could be monitored from outside of the environmental chamber and/or shock/Vibration table.

Health Management

The module also routes its IPMBA/B to a connector so an external health management could monitor each slot Sensor Data Records (SDR).

Specifications

Architecture		
Physical	**Dimensions**	Height:
		Width:
		Depth:
Standards		
VPX	**Type**	VITA 46.0 Baseline Specification dual slot conduction cool
Configuration		
Power	**VTX997**	Dependent on Payload Configuration
Environmental		Based on the Payload Module (VTX997 can operate from -45° to 85° degrees
Cooling		Platform Supplied Cooling – front to back and the wedge is kept at the set Temperature
Other		
MTBF	Calculated IAW MIL Hand book 217-F. Based on Order Option. Contact VadaTech sales for details.	
Certifications	Designed to meet FCC, CE and UL certifications, where applicable	
Standards	VadaTech is certified to both the ISO9001:2015 and AS9100D standards	
Warranty	One (1) year, see VadaTech Terms and Conditions	

INTEGRATION SERVICES AND APPLICATION-READY PLATFORMS

VadaTech has a full ecosystem of OpenVPX, ATCA and MTCA products including chassis platforms, shelf managers, AMC modules, Switch and Payload Boards, Rear Transition Modules (RTMs), Power Modules, and more. The company also offers integration services as well as pre-configured Application-Ready Platforms. Please contact VadaTech Sales for more information.

Ordering Options

Choose VadaTech

We are technology leaders

- First-to-market silicon
- Constant innovation
- Open systems expertise

We commit to our customers

- Partnerships power innovation
- Collaborative approach
- Mutual success

We deliver complexity

- Complete signal chain
- System management
- Configurable solutions

We manufacture in-house

- Agile production
- Accelerated deployment
- AS9100 accredited
