VadaTech partners with Emcomo Solutions AG to present at the 5th MicroTCA Workshop

Henderson, NV – November 29, 2016 – VadaTech, together with integration partner Emcomo Solutions AG, will present innovations in MicroTCA at the 5th MicroTCA Workshop for industry and research taking place at DESY in Hamburg, Germany on 7th and 8th December. The workshop provides an opportunity to showcase the latest MicroTCA and MicroTCA.4 technology, and to hear about applications across the worldwide research community. VadaTech will present new developments enhancing power and connectivity within the MicroTCA standard, particularly suitable for ASIC emulation, sensor processing, low-latency control, and other demanding applications.

Demonstration of a DAQ Series™ data acquisition system will be held at the associated exhibition. DAQ Series™ provides modular, configurable data acquisition based on open standards, allowing users to quickly deploy complete acquisition capability or to build custom acquisition, processing and user interface systems. DAQ Series™ is extensible in supporting user-defined front-end signal conditioning for specific customer requirements and includes an EPICS driver for ease of integration.

About VadaTech

[VadaTech](http://www.vadatech.com) provides innovative embedded computing solutions from board-level products, chassis-level platforms, to configurable application-ready systems. With a focus on AdvancedTCA, MicroTCA, VPX and PCIe solutions, the company offers unmatched product selection and expertise. A unique combination of electrical, mechanical, software, and system-level expertise, enables VadaTech to provide customized commercial or rugged computing solutions to meet the most complex customer requirements. VadaTech also offers specialized product solutions for VME, CompactPCI, and other architectures. A member of PICMG and VITA, VadaTech has headquarters, design and manufacturing facilities in Henderson, NV with design, support and sales offices in Europe and Asia Pacific.
