VadaTech Announces a 3U VPX, Rear I/O module with Dual QSFP28, Single GbE and GPIO

Henderson, NV – June 14, 2023 – VadaTech, a leading manufacturer of integrated systems, embedded boards, enabling software and application-ready platforms, announces the [VRT584A](#). The VRT584A is a 3U VPX Rear Transition Module providing I/O expansion for use with the VPX584.

The Dual QSFP28 on the module are routed from RP1 to back panel with an additional GbE via RJ-45. The module has a CDR on board per each QSFP28. The module also has a 0.1" header for user defined I/O which is configurable by the FPGA as seven LVDS or 14 Single Ended. Please consult with VadaTech Sales to discuss ordering options.

About VadaTech

[VadaTech](#) provides innovative embedded computing solutions from board-level products, chassis-level platforms, to configurable application-ready systems. With a focus on AdvancedTCA, MicroTCA, VPX and PCIe solutions, the company offers unmatched product selection and expertise. A unique combination of electrical, mechanical, software, and system-level expertise, enables VadaTech to provide customized commercial or rugged computing solutions to meet the most complex customer requirements. VadaTech also offers specialized product solutions for VME, CompactPCI, and other architectures. A member of PICMG and VITA, VadaTech has headquarters, design and manufacturing facilities in Henderson, NV with design, support and sales offices in Europe and Asia Pacific.
